

CPSC-24500: Object-Oriented Programming – Week 5

Welcome to Week 5. We just crossed the half way point. I suspect that the Mosaic programming assignment was easier than FaceDraw. This week we are going to move on to working with files and serialization, testing, multi-threading, and Java packages. This week's assignment will be a performance optimization challenge.

To-do List – Week 5 (April 17 to April 23):

1. Take a quick look through the slides and notes [\[link\]](#) to get a feel for the learning objectives.
2. Review this week's assignment [\[link\]](#). Our FastPrime performance programming challenge programming assignment this week will be substantially different than our programming assignments in the last couple weeks. Threading will be the primary new concept that will be introduced, and application performance will be the assignment goal.
3. Double-check the course source code that is available either through a browser [\[link\]](#) and/or by executing "git clone https://github.com/EricJPogue/CPSC-24500.git".
4. Watch the Object-Oriented Programming week 5 session 1 video [\[link\]](#).
5. Participate in the Tuesday 3pm discussion and lecture... and/or watch the resulting video [\[link\]](#).
6. Review JUnit and how Java files [\[link\]](#) work.
7. Complete your Discussion Board posting by the end of the day Wednesday.
8. We are going to try our Thursday Discussion & Lecture session over lunch for another week. Bring your questions. Grab your lunch and we will plan on starting at 12:10 and will not go past 1. We will see how a lunch session works and continue to adjust going forward.
9. Respond to one or more other Discussion Board postings by the end of the day Friday.
10. Complete your week 5 assignments and turn it in through the Blackboard "Homework" links by the end of the day Sunday.

Let me know how you are proceeding during the week. Feel free to send me an email or to post something in our "Coffee House" discussion board forum if you have any questions.

Hope to see you Tuesday... and/or Thursday. Have a great week!
