CPSC-24500: Object-Oriented Programming – Week 2

Introduction: Welcome to Week 2. We covered a lot of material I Week 1, but didn't get a chance to write much code. This week get your Java compilers out. We are going to start using some of the concepts we learned last week.

To-do List – Week 2 (March 27 to April 2):

Monday:	Review this week's slides and notes [link]. Focus primarily on the Learning Objectives for the week. You will likely find it valuable to following along in the notes as you watch the related lecture videos: ▪ Session 1 [link]: Object-Oriented Programming (OOP) Overview ~30 min ▪ Session 2 [link]: OOP Concepts ~60 min ▪ Session 3 [link]: OOP Patterns and Principles ~60 min Please review Sessions 1 and 2 by noon on Tuesday and be prepared to discuss related topics in our (optional) Tuesday 3 PM discussion session. You can review Session 3 anytime during the week.
Tuesday:	Our live discussion will be on Tuesday at 3pm (CST) this week. The session will be recorded and a link will be provided here [link] when it is available.
Wednesday:	Please complete your discussion board (DB) posting.
Friday:	Review your classmate's discussion board posts and respond to at least one of their posts.
Sunday:	Submit homework [link] using blackboard "Homework" link.

Feel free to send me an email or to post something in our "Coffee House" discussion board forum if you have any questions or have any issues accessing the above content. Also, be looking at the Announcements section of Blackboard during the week as I am sure that something will come up.

Hope to see you Tuesday. Have a great week.
